Mike – I appreciate your help. I hope I'm not imposing too much – but I do wonder about the influence of the drugs they will give you on the information you will be sending me ;))

Good luck on the knee surgery. When you are gone, who else in your shop might be able to get me a some phone numbers? Just b/c I'm running short on time.

Thank you.

Importance: High

Mike – I need your help ASAP for some access on the Upper Animas. The Eco tox crew is heading out 2 weeks from today with USGS to place some monitoring equipment in the Animas River and we need access at various locations along the river. Right now, BLM has identified 2 property owners along the river that are out of state with only “snail-mail” contact information. I would like to get a phone number so that I can contact them 1st before sending them an access agreement in the mail. Time is of the essence and I’m afraid that we will not have the access we need to place this equipment in the river before the spring runoff gets going in earnest.

If you can track down a phone number for each of these owners, then I will make the calls.

I can take care of the two locations owned by the Town of Silverton but I need help with NM and NY. There may be a couple more locations that we need assistance with once the ownership is determined.

I’m here today (Monday) but tomorrow AM I won’t be in until ~9:30 or so and then I have a meeting with city of Denver @ 1:00 pm – 2:30 pm. Thanks.

Good Afternoon, Paula,

Ownership status for 4 USGS gauges:

~A55 Howardsville gauge sits on Howardsville Millsite (37.83280, -107.599747)

Owner: RE & Kathy Hudson

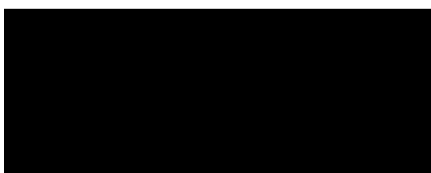

~M34 Mineral Creek above Animas confluence gauge sits on Town of Silverton Property (37.802639, -107.672746)

~A68 Animas @ 14th St. Bridge sits on Town of Silverton Right of Way (37.811082, -107.659276)

~A72 Animas above canyon may sit on BLM but more than likely on the Limestone (37.790043, -107.667564)

Owner: William Rogers

I'll await your larger list of sample sites to begin looking searching for all the others . Have a great day.

Lisa – We are planning to put a mini-sipper at the Howardsville gaging station which is a State-owned gaging station. I will try and contact the State person on Monday to see what their access arrangements are but if you could identify the ownership with contact info – see attached map, that would be helpful. Thanks.
